

# #ACTIONS FOR CLIMATE

## CALL TO ACTION: 26 September [#ActionsForClimate](#)

Join the [Global Day of #ActionsForClimate on 26 September](#) to demonstrate the solutions to climate change and confront those that are holding us back.

Nothing stops climate change faster than our actions. The global temperature keeps rising; extreme weather events are becoming more frequent; people are being forced to leave their homes. The climate crisis will continue if we let it.

Where is the necessary response from our political and business leaders? We are weeks away from the COP21 in Paris where countries will sign a global climate agreement - will it be strong enough to stop the onset of catastrophic climate change?

We have a problem and our actions are the solution. This is the moment when we all work together to kickstart laggard politicians and stand up to short-sighted, corporate interests. This is about turning heads, using action over apathy, creativity over complacency and our agility against all those that get in the way of the rapid change we need.

We're going to give our leaders a collective, global kick in their briefcases and challenge them to show the visionary leadership the planet needs.

We know what the solution is - 100% renewable energy and 100% forest for all by 2050. We know it's possible.

On [September 26, thousands of people will take #ActionsforClimate across the globe to demonstrate the solutions to climate change](#) and confront those that are holding us back.

Join this Global Day of Action to highlight your solution to climate change and to call for a just transition to 100% Renewable Energy for all.

Join this massive display of people power on our path through Paris.

## WHAT TO DO?

- Plan your own action to demonstrate your solution to the climate crisis: Some groups are organising a solar powered street concert, an organic food stand or a critical mass bike ride. It's also a great opportunity to link this day to one of the existing campaigns that you might be working on.
- Photo- Opportunity: Take a photo and creatively display the just transition to 100% Renewable for all that we are demanding. There is no limit to the size or your creativity to visualise 100% Renewable: Think human bodies, bikes, wood chips, in front of a ministry or on top of a mountain. Try to make your photo as creative and impressive as possible and post it on your social media channels using the [#ActionsForClimate](#) hashtag.
- Social Media - Let's go viral - Show your solidarity with the actions taking place across the world for the Global Day of Action. Post a selfie with the [#ActionsForClimate](#) Hashtag and your demand for 100% Renewable for all. Promote the Global Day of Action with hashtag [#ActionsForClimate](#)
